

AI FOR SAP OPERATIONAL EFFICIENCY

Company Profile

PEOL Technologies Private Limited · an SAP Partner · **c16.ai**

An AI platform that helps enterprises get more from their SAP, optimising custom code, preparing for S/4HANA, and surfacing process and data issues, with your own experts in control.

Get more from your SAP, today

Most enterprises carry years of custom code, an approaching S/4HANA decision, and real value still locked inside the system. C16.ai is an AI platform for SAP operational efficiency that unlocks that value now. **You don't have to wait for S/4HANA:** C16 delivers on your live ECC today, and stays with you through the migration and onto S/4HANA.

It takes on the work that usually eats weeks: optimising custom code, discovering where business processes slow down, preparing for S/4HANA and Clean Core, and documenting legacy code, with your own experts reviewing and approving every change.

Four capabilities, one engine

> Migrate

S/4HANA and Clean Core readiness: Level A to D scoring, custom-code rationalisation, and a clear migration roadmap.

> Optimize

Process intelligence: find bottlenecks and optimise Order-to-Cash, Procure-to-Pay and Record-to-Report, with data-quality scoring.

> Modernize

ABAP optimisation (HANA pushdown) and modernisation of legacy code to RAP, CDS and Fiori.

> Advise

AI-drafted functional and technical documentation, SoD and security audits, and Fit-to-Standard analysis.

Eleven solution areas, 90+ deliverables

The four pillars span eleven solution areas. A sample of what each delivers:

Area	Focus	Example deliverables
A	Landscape Discovery	System inventory, object census, integration map
B	Process Intelligence	P2P analysis, O2C audit, cycle-time reports
C	Migration Intelligence	Clean Core assessment, simplification mapping
D	Code Modernization	ABAP refactoring, RAP conversion, Fiori apps
E	Compliance & Security	SoD analysis, authorization audit, data privacy
F	Data Quality	Master-data scoring, duplicate detection
G	Performance	Runtime analysis, pushdown optimisation
H	Testing	Unit-test generation, regression suites
I	Integration	API discovery, interface documentation
J	Technical Operations	System health, transport analysis, EarlyWatch
K	AI Advisory	Use-case prioritisation, ROI, governance

Architecture and security

C16 runs as a secure cloud service and connects to your SAP over an encrypted link. It reads to analyse, and never acts on its own. No software to install, no middleware, no HANA required.

Your SAP landscape

- ECC 6.0 or S/4HANA
- S/4HANA Private Cloud
- Any database underneath
- A read-only, least-privilege connection you control

Secure, encrypted
connection
TLS 1.3

C16 platform, hosted on AWS

- AI engine for understanding your SAP
- Analysis: Clean Core, process, security
- Code generation and modernisation
- Documentation and branded reports

Read-only by default

No changes without your approval.

Least-privilege access

You control exactly what it can reach.

Hosted on AWS

AES-256, TLS 1.3, ISO 27001 certified.

Your data stays yours

Queries run live, nothing is persisted.

Proven with real customers

PROCESS & PAYMENT INTELLIGENCE

Casagrand Group

"It connected to our SAP system and within one session identified specific bottlenecks, actual root causes tied to specific vendors and config gaps. What would have taken my team weeks was done in hours. Specific, evidence-based, and actionable."

Hanuman Joshi, Group CFO

One of India's leading residential real-estate developers

MULTI-PILLAR ENGAGEMENT

Large Indian manufacturing conglomerate

S/4HANA 2022 · 200+ plants · 50,000+ vendors

Migrate. 2,543 custom objects classified: retire, replace, remediate, extend.

Optimize. 42 sub-processes scored across 9 modules, bottlenecks pinpointed at each stage.

Advise. License BOM (588 users, 7 packages) and a plant-rationalisation roadmap.

Across engagements: full RAP applications built and deployed, thousands of custom objects analysed in a single assessment, and every finding grounded in real SAP data, not guesswork.

Trusted by enterprises across **manufacturing** and **real estate**, with further references available under NDA.

Who we are

C16.ai is built by **PEOL Technologies**, an SAP Partner with over a decade of SAP delivery across financial services, manufacturing, apparel and pharma in Europe, North America and India, backed by a strong in-house SAP engineering bench. C16 is two decades of that delivery expertise, turned into an AI platform.

Prashant Nagathan

Co-founder & CEO. Leads C16 strategy, product and go-to-market; 20+ years in the SAP market; co-founded PEOL in 2010.

Vinod Kumar

Co-founder & Chief Architect. Deep SAP Banking and solution architecture; ex-SAP GDC; drives PEOL's SAP engineering.

Prashanth P M, PMP

Product Owner & Head of Presales. 20+ years in SAP delivery (ex-SAP Labs and GDC); owns the C16 product and presales.

Ataul Baseer

Head of Business Development & Key Accounts. Leads key accounts, sales and bid management.

How we engage

Start with a **free SAP Health Check**, a read-only diagnostic delivered as a branded report. Expand into fixed-fee deliverables, then an ongoing subscription for continuous Clean Core and operational efficiency.

SAP Partner

ISO 27001 certified

SOC 2 Type II compliant
